ALEJANDRO GONZALEZ

Monterrey, NL | +52 (81) 1799-3724 | adgonzalezcarrillo@gmail.com | linkedin.com/in/alexcgzz | github.com/Alexcgzz

PROJECTS

PrestaMX - Fintech Credit ELT Pipeline | *Snowflake, dbt, SQL, Git* | *github.com/Alexcgzz/prestamx-credit-pipeline*

- Built a layered ELT pipeline (raw → staging → marts) in Snowflake, modeling ~82K records across staging and mart models with dbt.
- Engineered loan-delinquency logic from actual payment behavior (days overdue via DATEDIFF, installment classification) to compute delinquency rate and balance-at-risk by product, instead of trusting unreliable source status flags.
- Added dbt data-quality tests (unique, not_null, accepted_values) that surfaced 25 duplicate records; scheduled automated runs in dbt Cloud; versioned work with Git feature branches and Pull Requests.

Seguros Monarca - Insurance Analytics Pipeline | *Python, pandas, AWS S3, AWS Athena, SQL* | *github.com/Alexcgzz/seguros-monarca-data-pipeline*

- Built an end-to-end batch pipeline that ingests and profiles ~37K records across 4 sources, resolving 6 classes of data-quality issues (mixed date formats, duplicates, nulls, inconsistent categories).
- Modeled cleaned data into a star schema stored as partitioned Parquet in Amazon S3, queried with SQL via Amazon Athena (including multi-table JOINs) to answer 5 business questions.

EXPERIENCE

NETLOGISTIK (AN ARGANO COMPANY) - Monterrey, México

Leading digital supply chain transformation consultancy specializing in SAP and Blue Yonder implementations.

Software Developer | January 2024 – August 2026

- Built a customer data extraction and transformation (ETL) program for PiSA's S/4HANA migration that feeds route-planning software, mapping 33 fields with lookup-based region resolution and region-based file splitting.
- Developed a real-time data interface for Nadro that lets automated sorting equipment query the warehouse system and receive a destination ramp in under a second across eight cascading validation scenarios, replacing manual dispatch.
- Debugged and stabilized an eight-interface integration between SAP and Blue Yonder for Grupo Consenso, keeping orders, goods receipts, inventory and shipping data flowing reliably in both directions and reducing failed transactions.
- Improved an inventory data-reconciliation solution for Levapan comparing stock between SAP and the warehouse system by product, batch and status and valuing differences against costing data; caught and flagged a specification error before it reached production.
- Created a custom warehouse reporting transaction for Mabe that joined product-catalog attributes with packaging specifications, closing a gap in the standard system and cutting manual data cross-checking.

GOOGLE SOFTWARE PRODUCT SPRINT | February 2021 – May 2021

- Designed and implemented a web application over 10 weeks using Java, JavaScript and Google Cloud Platform (App Engine, Datastore), practicing Git/GitHub version control, code reviews and distributed development.

TECHNICAL SKILLS

- **Programming:** Python, SQL, ABAP, Excel
- **Data Engineering:** ETL / ELT, data modeling (star schema, staging / marts), data-quality testing, Parquet
- **Cloud & Warehouses:** AWS (S3, Athena), Snowflake
- **Transformation & Orchestration:** dbt (dbt Cloud, scheduled jobs)
- **Tools & Methodologies:** Git / GitHub, Jupyter, Jira, Agile / Scrum
- **Certifications:** AWS Certified Cloud Practitioner (in progress)
- **Languages:** Spanish (native), English (C1 / IELTS 7.5)

EDUCATION

TECNOLÓGICO DE MONTERREY - Monterrey, México

B.S. in Computer Science and Technology (GPA: 9.5/10.0) | 2019 – 2023

- Elected Vice President of ACM Monterrey, organizers of HackMTY — the largest student hackathon in Mexico and Latin America.
- Awarded the national CENEVAL Award for Excellence for an outstanding result on the Software Engineering EGEL exam (2023).

UNIVERSITY OF TURKU - Turku, Finland | International Student Exchange Program (Aug 2022 – Dec 2022)

ADDITIONAL INFORMATION

- **Courses:** SAP BTP Backend Developer Master Program (300 hrs) and SAP Integration Suite Intensive Workshop (150 hrs), Logali Group (2026);
